## *Jewellery for your home*

How often do you use a switch or socket? You encounter them without even thinking about it throughout the entire day. I like to think of a good switch as a piece of jewellery for your home. Personally, I believe they should be timeless and stylish. At De Oude Schakelaar, we inspire interior enthusiasts and home renovators every day with the impact switches and sockets have on the overall harmony of your space.

We specialise in stylish, new, and safe switches and sockets that allow you to add a personal touch to your home. The perfect balance between timeless design and modern quality.

You can choose from various shades of white or black. Additionally, we offer different materials, including bakelite, porcelain, and our own brand made of high-quality plastic. It has the same characteristic shapes, but is easier on your wallet. You will also discover minimalist round switches in our collection. The frameless design is innovative, integrates seamlessly into your wall, and adds a subtle statement to your interior.

*Erik Tijmense*

# Matte black

- Same shape as authentic switches and sockets
- Sleek finish thanks to a perfect fit on the wall
- More scratch-resistant than glossy plastic switches and sockets
- Child-safe thanks to built-in protection
- Quick and easy to install
- Significantly more affordable—save up to 40% by choosing the De Oude Schakelaar brand

## *Attention to detail*

There's a sense of luxury in knowing that attention has been paid to details. With the perfect blend of shade and texture, our matte black sockets and switches create a calm environment where you can fully unwind.

Bring an atmosphere into your home where you feel comfortable every day—a new dimension of style and comfort. Did you know that this series was designed by us and is not available anywhere else?

# Glossy black

- The smooth finish provides a luxurious, high-quality appearance
- Quick and easy to install
- Faster and simpler to install than bakelite or porcelain sockets and switches
- Significantly more affordable—save up to 40% by choosing the De Oude Schakelaar brand
- The perfect choice to pair with black bakelite

## *Personal touch*

Give your interior a personal touch with stylish round black switchgear. Thanks to the use of excellent materials, modern technology, and rounded shapes, it makes a world of difference in your interior. No surprise it was featured on the cover of VT Women (May 2023). Plus, it's easy to install and easy on your wallet.

Explore which black switch or socket can add the perfect finishing touch to your home.

# White

- Child-safe thanks to built-in protection (free upgrade worth €4.05)
- The rounded shapes give this series an elegant appearance
- Bright white in colour, comparable to RAL 9016. Looking for a warmer shade of white? Take a look at our bakelite and porcelain options
- Significantly more affordable—save up to 40% by choosing the De Oude Schakelaar brand

## *Bright white*

Enhance your interior and create an authentic home with elegant white switches and sockets. Quality is paramount, and you'll notice it with every press of a switch and every time you plug into a socket.

The difference from white bakelite? It's a brighter white, easier to install, fits perfectly against the wall, and is easier on the wallet. Discover which white switch or socket can add the perfect finishing touch to your home.

# Black bakelite

Transform your house into a characteristic home with our authentic bakelite switchgear. You can feel the quality with every touch. As you should – our switchgear has been handcrafted with great passion since 1909.

- Authentic appearance combined with modern technology
- Each switch is unique, thanks to expert craftsmanship
- Distinctive bakelite sheen
- 5-year warranty

## *Durable*

Considering porcelain switchgear? Then you can count on quality and durability—not just for a moment, but for a lifetime. White porcelain switchgear does not discolour, and it's not just the colour that is future-proof; the technology is too. The internal mechanisms of our porcelain switches are crafted using sturdy metal and copper connections. You can see and feel that quality, and you can even hear it with every turn of a switch. A dream for every enthusiast!

Bakelite

Plastic

Porcelain

## Three Shades of White

Looking for a specific shade of white? Good to know: our switches and sockets come in various colour nuances. So, what's the difference? Our in-house brand offers a bright, pure white, comparable to RAL 9016. Bakelite, on the other hand, leans more towards cream, similar to RAL 9003. Lastly, white porcelain has a soft grey/beige undertone, comparable to NCS S 1002-Y20R. This way, there's a perfect shade for every interior!

Want to ensure a seamless colour match? Visit our inspiration space (by appointment) or place a sample order.

# rond

Add a subtle statement to your interior with rond switches and sockets. Its borderless design is minimalistic and innovative, integrating seamlessly into your wall. Not only does it transform your space, but it's also incredibly easy to install - fitting almost any wall type.

- Unique and minimalistic design
- Quick and easy to install
- Suitable for nearly all wall types
- Tailored to your style
- 2-year warranty
